AGILE

Desking System

AGILE SYSTEM

Standing is the new sitting – and not just because it burns calories! Standing at your desk improves posture and promotes mental well-being.

Studies suggest sit/stand desking solutions are key components in the journey of increasing productivity from workers, through focusing concentration and boosting energy levels.

Agile offers fixed height, winder and electric height adjustable solutions that are designed to work in the same places you do. Today's businesses are using sit-stand systems in collaborative offices, management spaces, meeting areas or at home, and Agile's understated simplicity is ready to move right in.

Standing at work helps to **generate more ideas**

Standing burns, on average,

50

MORE CALORIES PER HOUR

Studies have shown

87%

of workers **felt more energised** using a sit/stand desk

When using stand-up desking people are **faster at solving complex cognitive tasks...**

... People also **make less mistakes** while solving complex cognitive tasks

Medium Office Spaces

The modern office is a combination of collaborative zones and traditional workplace privacy. Agile System with screens offers the best of both worlds. The simplicity of electric height adjustment, the symmetry of double-sided and singled-sided desks, the eye-catching design of colourful & practical privacy screens, and the health and productivity boosts of periodic standing throughout the day.

Large Office Spaces

Small Office Spaces

Agile's sleek, space-saving design works well even in small offices, where space is at a premium. The minimalist H-frame allows for team meetings, either sitting or standing, and the single desks are perfect for individual work. Agile delivers the proven benefits of posture change at work whilst offering a contemporary and practical design for compact spaces.

Private Spaces

Creative Spaces

In addition to the numerous health benefits provided by periodic standing, studies show that height adjustable desks promote creativity, team interaction, collaboration, and the willingness to share ideas. This makes Agile the ideal choice for designers' studios, ad agencies, and any other environment where teamwork and creativity are key.

AGILE KEY FEATURES
